11.30 am-1 pm: Poster and Presentation Session for
Research Project by PhD/ Graduate Students
Lunch break

2-3 pm: Evaluation of the Programme

End of Programme

ABOUT

It has been a major question in traditional theological thinking how the Divine Attributes are to be understood. Recent debates in analytical philosophy have allowed new approaches that, however, are often not linked to those traditional debates. The project “Building bridges between traditional thought and analytical philosophy - Rethinking Divine Attributes in Islam and Christianity” aims at bringing the traditional theological discussions in touch with the modern analytical debate. Moreover, analytical philosophy has mostly focussed on Christian Theism, while we intend to explore the possibility of using analytical philosophy as a tool in inter-religious dialogue. Thus, the project focuses on the following questions:

- How can we perceive the attributes of Omnipotence and Omniscience, Justice and Mercy, Simplicity and Divine Action?
- What can analytical philosophy contribute to an understanding of those attributes?
- Is analytical philosophy an appropriate method to find a „common ground“ between Muslim and Christian theologians who are dealing with similar questions?

Those questions will be explored in three consecutive Summer Schools. This format aims at connecting people and discourses that would otherwise remain separated. The second Summer School, “Discussing the Divine Attributes in Muslim-Christian Dialogue 2021: Justice and Mercy”, will take place from August 9 to 13, 2021.

SERVICES

Students from Iran: financial support for travel 400 € (round trip)

Students from Turkey and Tunisia: financial support for travel 200 € (round trip)

Accommodation will be covered for all students except for students from Paderborn, it will be provided from August 8 to 14 in four-bed rooms (single rooms for surcharge can be requested).
